**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-3,5-18,20-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 14, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed limitations which includes an apparatus comprising a first, second and third light emitting diode, a first reflecting surface, second reflecting surface, a first filter disposed between the first reflecting surface and the second reflecting surface and configured to reflect the light reflected from the first reflecting surface and transmit the light from the second reflecting surface; a second filter disposed between the first reflecting surface and second reflecting surface and configured to reflect light from the second reflecting surface and to transmit light from the first reflecting surface and light emitted by the third diode; and wherein an optical integrator is positioned to receive the combined light from the first and second filters as claimed.

Regarding claims 2,3,6,17,21,23-30, see applicant's argument at page 12, filed on 6/5/06.

Regarding claim 11, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed limitations which includes an apparatus further comprising, a fourth light

emitting diode, third reflecting surface, fourth reflecting surface positioned to reflect light from the fifth light emitting diode, wherein the first filter is further configured to reflect light from the third reflecting surface and to transmit light reflected from the fourth reflecting surface, and the second filter is further configured to reflect light from the fourth reflective surface and to transmit light reflected from the third reflective surface as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
